### M&D Mechanical Celebrates Current and Future Workforce

We have a lot of reasons to celebrate this month. We have added two key [new employees](#) to our staff, had an employee recently graduate from the [apprentice program](#), and got to see the future workforce through a visit of participants in the [2013 SWeETy Camp](#). We also had an opportunity for our employees to give back to our community through a recent [Habitat for Humanity project](#). We hope that you have just as many reasons to celebrate your workforce too!

### M&D Mechanical Hires New CAD Operator and Project Manager

We are proud to announce the addition of two key employees to our staff. We have recently hired Justin Strasburg as a CAD Operator and Michael Farley as a project manager. We are excited to have them join our team.

#### Justin Strasburg, CAD Operator

I attended my first year of college at Jacksonville State University going to school for business management. I went to visit my mother for the summer in Lincoln, NE and began working for a siding company. While working construction during the day and taking classes at night, I found that construction was in my blood. I moved back to Alabama after three years in Nebraska and finished out my degree in Business Management from Snead State and began working toward a degree in Drafting and Design Technology. In May 2008, I graduated from Wallace State with that degree and was fortunate enough to find a job in Decatur, AL

during my last semester of college. After working five years for a local mechanical engineering firm, I decided to take my talents to Sherman St.

**Michael Farley, Project Manager**  
When my wife, Megan, and I decided to move our family back to the Huntsville area, I asked those within the industry who they would recommend. The response was a unanimous recommendation for M&D Mechanical. From that point on I have learned more about the company's history, met more of the M&D people, and believe that I made the proper move.

### Chad Smith Graduates from the Pipe Fitter Apprentice Program

After working a year as pipe fitter helper, Chad decided to join the North Alabama Craft Training Foundation - Pipe Fitter Apprentice Program. Chad's background was Heating & Cooling but he dove right into learning everything about pipe and maintained an 'A' average over all 4 years. His mechanical drive continues as Chad is now learning how to weld pipe. Raising two children on his own, Chad's dedication & work ethics are a great example for them and M&D Mechanical.

## SWeETy Campers Visits M&D

We welcomed the 2013 SWeETy (Summer Welding and Electrical Technology) campers in July, showing them around our metal and pipe fabrication shops. See more [SWeETy Camp pictures](#).

## M&D Employees Switch to Paint Brushes for Habitat Project

Several M&D employees volunteered during a recent Habitat for Humanity of Morgan County project. The team met on a Saturday and spent several hours painting the house. See more pictures from the [Habitat project](#).
